

SUMMARY

Product leader who builds with AI hands-on and ships it into production. Runs a portfolio of five own AI products and took Vertov, an AI video platform, to live production: agent workflows, billing across seven model-provider gateways, and auto-evaluation of AI agents with judge agents and golden sets. Works daily in Claude Code, Codex CLI, Cursor and OpenCode with an executable skill library and dedicated subagents per hard skill. Built business cases and investment recommendations for C-level and board audiences, including a 10-year multi-scenario model defended before the VTB Bank board. Deep fintech domain: lending, payments, acquiring, e-wallets, audit at PwC and Tinkoff. Client-facing since day one: subsidiary CEOs, bank vice presidents, C-level committees.

PROFESSIONAL EXPERIENCE

Product Lead

Jul 2025 - Present

Independent AI Product Development

- Built Vertov, an AI video platform live in production: agent-based generation pipelines, usage-based billing across seven model-provider gateways with per-model COGS and FX-aware routing, and a margin guardrail that structurally refuses to sell below cost.
- Prototype working solutions with AI tools by default and ship them: the platform, four further products in conversational and voice AI, AI app generation and semantic search, and hand-built prototypes that predate each production build.
- Made AI agent quality measurable rather than assumed: scenario test cases, autotests, judge agents and a golden set wired into the delivery workflow.
- Work as an advanced Claude user: executable skill library, a dedicated subagent per hard skill, model-tiered delegation, adversarial review of every brief and diff before commit.

- Built a 10-year multi-scenario financial model and the build-vs-buy case with six implementation options, and defended it before the VTB Bank board, where the model became the basis of the investment decision.
- Ran workshops across legal, AML, finance and technology tracks, turning a fuzzy mandate into milestones, resources and cadence.
