PROFESSIONAL EXPERIENCE

Independent AI Product Development | Product Lead

Jul 2025 - Present

- Took Vertov, an AI video studio, to production end to end: billing and payment flows across seven AI provider gateways, per-model cost tracking, and a margin guardrail that refuses to sell below cost.
- Built auto-evaluation of AI agents: scenario test cases, autotests, judge agents and a golden set, wired into the daily workflow together with adversarial review.
- Automated research, reporting and project paperwork with AI agents: briefs, status updates, blockers and next steps, keeping the execution cadence tight.
- Built a personal AI environment as an executable skill library: a dedicated subagent with its own system prompt and guardrails for each hard skill.

- Aligned external vendors and consultants with internal engineering: renegotiated the technology and AML perimeter, adding 10-15 p.p. of modelled target margin to the business case.
- Built the investment case and defended it to the VTB Bank board: a 10-year multi-scenario model and six build-vs-buy options.
