SUMMARY

Strategy and operations lead with 6+ years in fintech and technology: strategy consulting (Tinkoff ecosystem audits, PwC), a high-growth marketplace (Wildberries fintech), and hands-on AI delivery. Owned a 15-initiative strategic portfolio with RUB 36B modelled annual profit potential, ran end-to-end deep dives into payments, vendor economics and cost structures, and drove solutions through implementation rather than stopping at recommendations. Advanced AI user: built agent-based workflows that automate research, analysis, reporting and documentation. Comfortable with messy data: SQL, data pipelines (Kafka, Airflow, DWH, OLAP), Python and Go.

PROFESSIONAL EXPERIENCE

Independent AI Product Development | Product Lead

Jul 2025 - Present

- Built repeatable AI workflows that eliminated recurring manual work: research briefs, status reporting, document generation and analysis pipelines run by dedicated agents with guardrails.
- Built auto-evaluation of AI agents: scenario test cases, autotests, judge agents and a golden set, so agent output quality is measured rather than assumed.
- Took Vertov, an AI video platform, to production end to end: billing and payment flows across seven AI provider gateways, per-model cost tracking, and a margin guardrail that refuses to sell below cost.
- Work as an advanced Claude user: executable skill library, a dedicated subagent per hard skill, adversarial review of every brief and diff before commit.

Head of Finance and Strategy

Jun 2025 - Jun 2026

Kompas Group JSC (shareholder: VTB Bank), Russia

Regulated cross-border digital-currency settlement platform under a Bank of Russia experimental legal regime.

- Owned the platform build end to end: scoped the problem, set milestones and resources, and drove implementation across legal, AML, finance and technology tracks through the first successful test transactions.
- Renegotiated the technology and AML vendor perimeter, adding 10-15 p.p. of modelled target margin to the business case.
- Built the investment case and defended it to the VTB Bank board: a 10-year multi-scenario model and six build-vs-buy options.

- Ran deep dives into payments and operations across seven fintech products (lending, insurance, acquiring, e-wallets): traced payment-gateway and microservice data through Kafka, Airflow, DWH and OLAP cubes to root causes, not symptoms.
- Led a team of six and coordinated 10+ cross-functional partners; presented findings with decisions and trade-offs directly to C-level stakeholders.
- Prepared go/no-go decisions on entering Turkey and Uzbekistan: built the evaluation from incomplete data across jurisdictions, tax and regulation.
